Forecast for Sunday 18 Jun 2023

Weather: A rather cloudy but dry start with some bright spells early in the morning. Sunshine then hazy with higher level cloud. By late morning, heavy and thundery showers are likely, though there remains some uncertainty in exactly where these will occur. Currently, these look mostly likely across eastern areas. In between any showers, there will be some warm sunny spells.

Chance of cloud-free hill tops above 600m: 80%, though 60% in the west at first.

Low cloud and visibility: Low cloud and mist patches forming at first in the west with bases around 500 m before lifting quickly through the morning. Risk of cloud shrouding tops during heavy showers and thundery outbreaks, where visibilities will drop to moderate/poor. Otherwise cloud largely remaining above tops, with good visibilities.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Gusty winds are likely near thunderstorms and heavy showers at times. Showers possibly torrential at times making walking conditions very difficult with visibilities dropping suddenly. UV Levels remain high with warm temperatures expected, even at height, so adequate hydration and sun protection is essential.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Sun 18 Jun 2023	0mm	0mm	0mm

Forecast for Monday 19 Jun 2023

Weather: A cloudy start with showers during the early hours through to dawn. Cloud gradually breaking to give sunny spells and further scattered showers. Showers could be heavy and locally thundery with gusty winds, though detail remains uncertain on the extent and distribution of these. Showers gradually easing into the evening to leave a dry night.

Maximum wind: Light to moderate southwesterly winds 10-15 mph though gusting 25-30 mph in any showers.

Chance of cloud-free hill tops 600m: 80% but 60% in west at first.

Low cloud and visibility: Low cloud in the southwest at first, with bases 500 – 600 m, this lifting readily by morning with cloud then remaining above summits with very good visibilities. Risk of cloud shrouding tops during heavy showers and thundery outbreaks, where visibilities will drop to moderate/poor.

Temperature: **Valleys:** Plus 15 Celsius rising to plus 20 Celsius
At 600m: Plus 10 Celsius rising to plus 16 Celsius
Freezing level: Above summits.
